- Mounting hardware
- C/US Listed self regulating 13w/ft heat cable
 - 110-130v or 208-277v (voltage specific)
- Power Connection Kit

VersaScreen 5 IceBlaster FE with EMS Eave Panel (FE5 with EP-SO)

The FE5 w/ EP-SO is a heated gutter guard system designed to work on most styles of gutters including K style and fascia style. It is specifically designed to prevent ice dam and icicle build up at the eaves and gutters. The highly efficient system is comprised of the VersaScreen 5, FE Cover, and the EP-SO along with supplied self regulating heat cable. Installation is simple. Route heat cable in the gutter bottom, downspout and on top of the screen. Secure heat cable on top of the screen with FE Cover flashing. Install EMS EP-SO per instructions. Expert design layout and installation guidance are available with order.

NOTE:

Roof drip edge or gutter apron, ice/water shield, tarpaper, gutter straps, and other features omitted for clarity. VersaScreen and IceBlaster EMS products are fully compatible with most roof styles and systems.
